

# Eliminate Waste Create Flow

## Business Process Engineering

Numerous sources indicate that the cost of scrap and rework can be as high as 3-5% of sales! Furthermore, the direct, measurable costs represent, only, the tip of the iceberg and approximately one-sixth the total cost. Business Process Engineering (BPE) Consulting Services offer a holistic approach to reevaluating and optimizing business processes. This fact sheet outlines the key features and benefits of engaging in Business Process Engineering Consulting.

### Right Process = Right Results

Our team will conduct a thorough analysis of existing business processes, identifying inefficiencies, bottlenecks, and areas for improvement. We will assist you in rethinking and redesigning workflows to align with organizational goals, industry best practices, and the latest technologies. We can help you to better leverage cutting-edge technologies and automation tools to enhance process efficiency, reduce manual intervention, and improve overall productivity. Through this process we can assist you in building a culture of continuous improvement, ensuring that processes evolve with changing business landscapes and industry dynamics.

### Realizing The Value

- Achieve significant improvements in operational efficiency by eliminating redundancies, reducing lead times, and optimizing resource utilization.
- Identify and eliminate unnecessary costs through process streamlining, automation, and resource optimization.
- Improve customer satisfaction by optimizing processes that directly impact the customer journey, resulting in quicker response times and higher service quality.
- Build agility into the organization by creating processes that can adapt quickly to market changes, ensuring resilience and competitiveness.
- Implement data-centric approaches to decision-making by incorporating performance metrics, analytics, and real-time monitoring into the business processes.

### How We Can Help

- **Full project or program management** – End-to-end management of new design (DMADV), redesign (DMAIC), or incremental improvement (PDSA, A3).
- **Facilitation** – Rapid improvement, Kaizen, 3P, or 5S, events
- **Coaching** – Implementation, and alignment of management systems to sustain results.
- **Training** – Develop your team in all aspects of improvement science, at all levels of the enterprise.

*"I had the honour to work with Brad while at Garnet Health in New York on a process improvement event for ED throughout and decreasing our length of stay metrics. Brad has great insights on Program Development, Process Engineering, and Lean Six Sigma processes. I highly recommend him and the work he delivers is exceptional."*
